DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Pirskanen (WO 03/073025).

Pirskanen discloses a method and apparatus for controlling refrigerating installation. The method comprises steps of selecting two or more compressors connecting each to its own frequency converter, controlling the frequency range of the compressors controlled by the frequency converters and controlling the operation to meet the required output (predetermined criteria) by starting the compressors in a predetermined order and by controlling the frequency of the compressors connected to the frequency converters. The refrigeration circuit is inherent in the system. One predetermined criteria is disclosed in this prior art.

3. Claims 1,2 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Rafuse Jr. et al. (U.S. Patent Number 5,797,729).

Rafuse Jr. et al. disclose a method an apparatus for controlling multiple variable speed compressors. Referring to Fig.1, the apparatus comprises controller 32, compressor drive 34,36,38, compressor 10,12,14, condenser 22, expansion valve and evaporator 16. The controller is configured to determine the subset of compressors by comparing a required rack capacity against a stored set point table defining a plurality of ranges of required rack capacity over which

Art Unit: 3744

different subsets of the plurality of variable speed compressors provide a greater energy efficiency ratio than any other subsets.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1,2 and 17 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2-7,33-35 and 44-46 of copending Application No. 10/822,492 (US 2005/0223724). Although the conflicting claims are not identical, they are not patentably distinct from each other because ‘492 claims the limitations in current application plus the monitoring the operation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 3744

Allowable Subject Matter

6. Claims 3-16 and 18-26 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
